

Important aids that keep track of cable trenches

# **KELMAPLAST Cable Marking Bands:** Perfect, practical, indispensable

**KELMAPLAST** cable marking bands are perfect for bundling cables and cable conduits. They make inconspicuous but indispensable aids for keeping track of cable trenches.

The cable marking bands are made of ecofriendly polyethylene (PE). Resistant to cold and ageing, they are also UV protected, which means they are colour- and lightfast and, as such, suitable for use above ground. Even years later, accurate and immediate identification of the type of cable and its owner is no problem thanks to the customised and permanently legible marking (in colour, imprinted or embossed).

The integrated label flag measures 60 mm x 20 mm and has space for two lines of lettering to be imprinted or embossed by **KELMAPLAST**, as required. With the aid of extension bands, it is also possible to label larger cables with a diameter of over 95 mm.

If the label flag is not sufficient for the necessary lettering, we recommend using an additional cable marking flag (**KELMAPLAST** Nr. 4020) for an extra label on the band.

# **KELMAPLAST Cable Marking Band No 40**

### Imprint I: hot colour stamping

Text length maximum 14 characters per line Imprints in white and black (other colours on request).

#### Imprint II: sunken imprint

Text length maximum 18 characters per line.

#### Imprint III: embossing (raised)

Text length maximum 15 characters per line, quantities of at least 500 pieces of the same, size and text possible.

# Specifications

Special polyethylene, cold resistant (to -90 °C), heat resistant (to +70 °C), UV protected, ageing resistant, colourfast, great durability, available in the colours: red, blue, yellow, green, grey, brown, black, orange, purple and white.

This cable marking range includes the following article sizes:

No 4040  $\rightarrow$  cable-Ø 40 mm (170 mm long)

- No 4060  $\rightarrow$  cable-Ø 60 mm (230 mm long)
- No 4095  $\rightarrow$  cable-Ø 95 mm (340 mm long)
- No 4070  $\rightarrow$  short extension band, 220 mm long
- No 4080  $\rightarrow$  long extension band, 340 mm long
- No 4020  $\rightarrow$  cable marking flags, additional 2-line label area

The minimum sales unit is a PE bag containing 200 pieces.

For customers who wish to label their cable marking bands themselves, KELMAPLAST offers the following solutions:

KELMAPLAST Manual Stamping Machine No 41, Table Stamping Machines No 42 and 43

There's a matching type set for all stamping machines (nos 41 to 43) and all types may also be obtained separately.
